

ARCHIBUS Training

2025

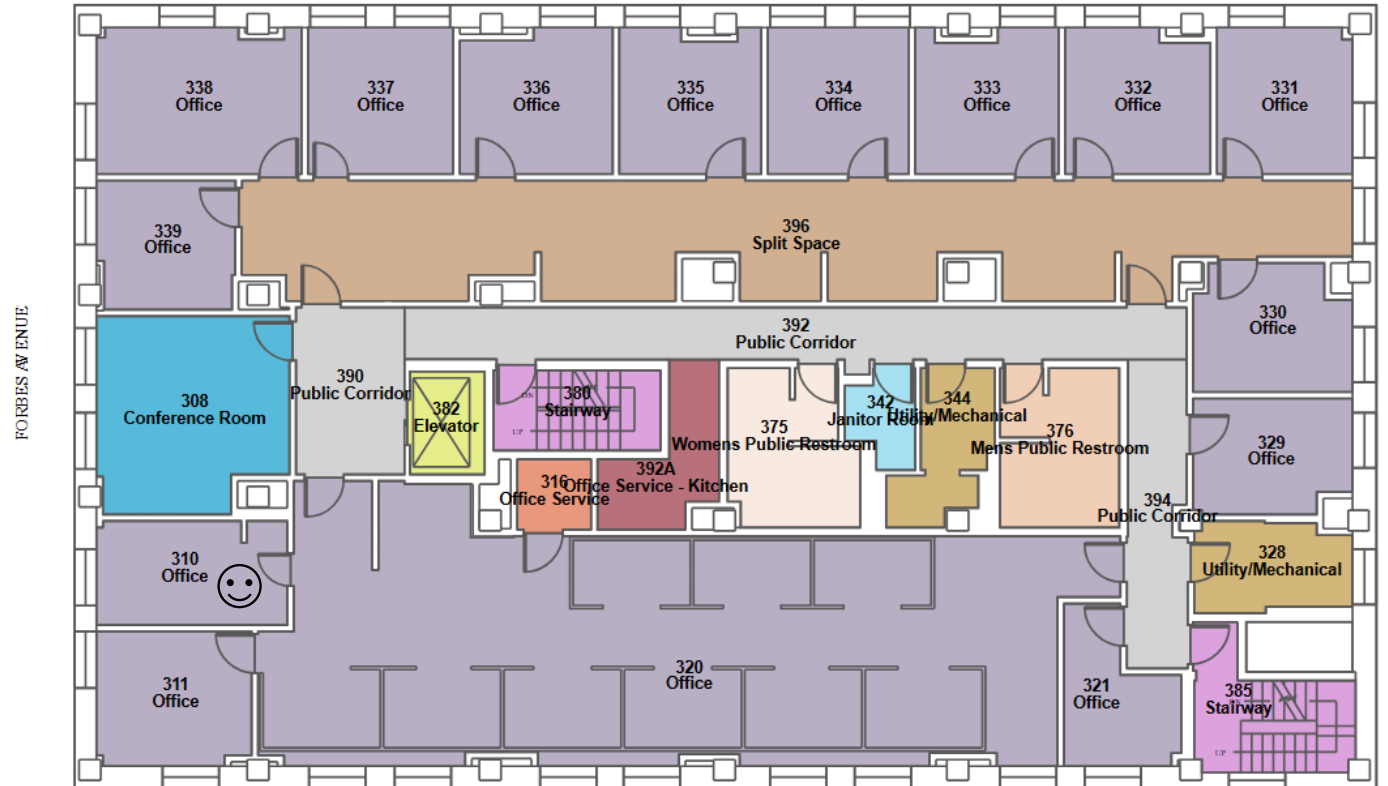

Agenda

- ARCHIBUS - What is it?
- Space – How do we track it?
- Data Elements & FICM Codes
- ARCHIBUS Demo

ARCHIBUS – What is it?

ARCHIBUS is Pitt's new space management system.

- Building Data
- Space Data
- Floor Plans
- Asset Data

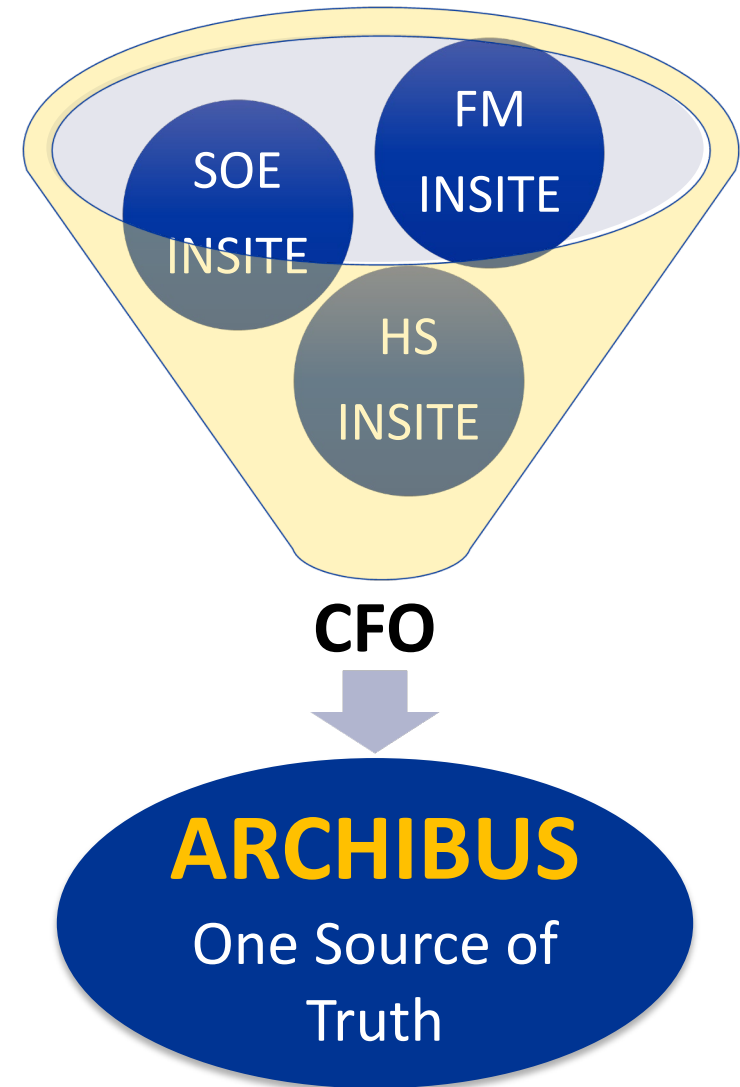

ARCHIBUS view of Eureka Building 3rd Floor

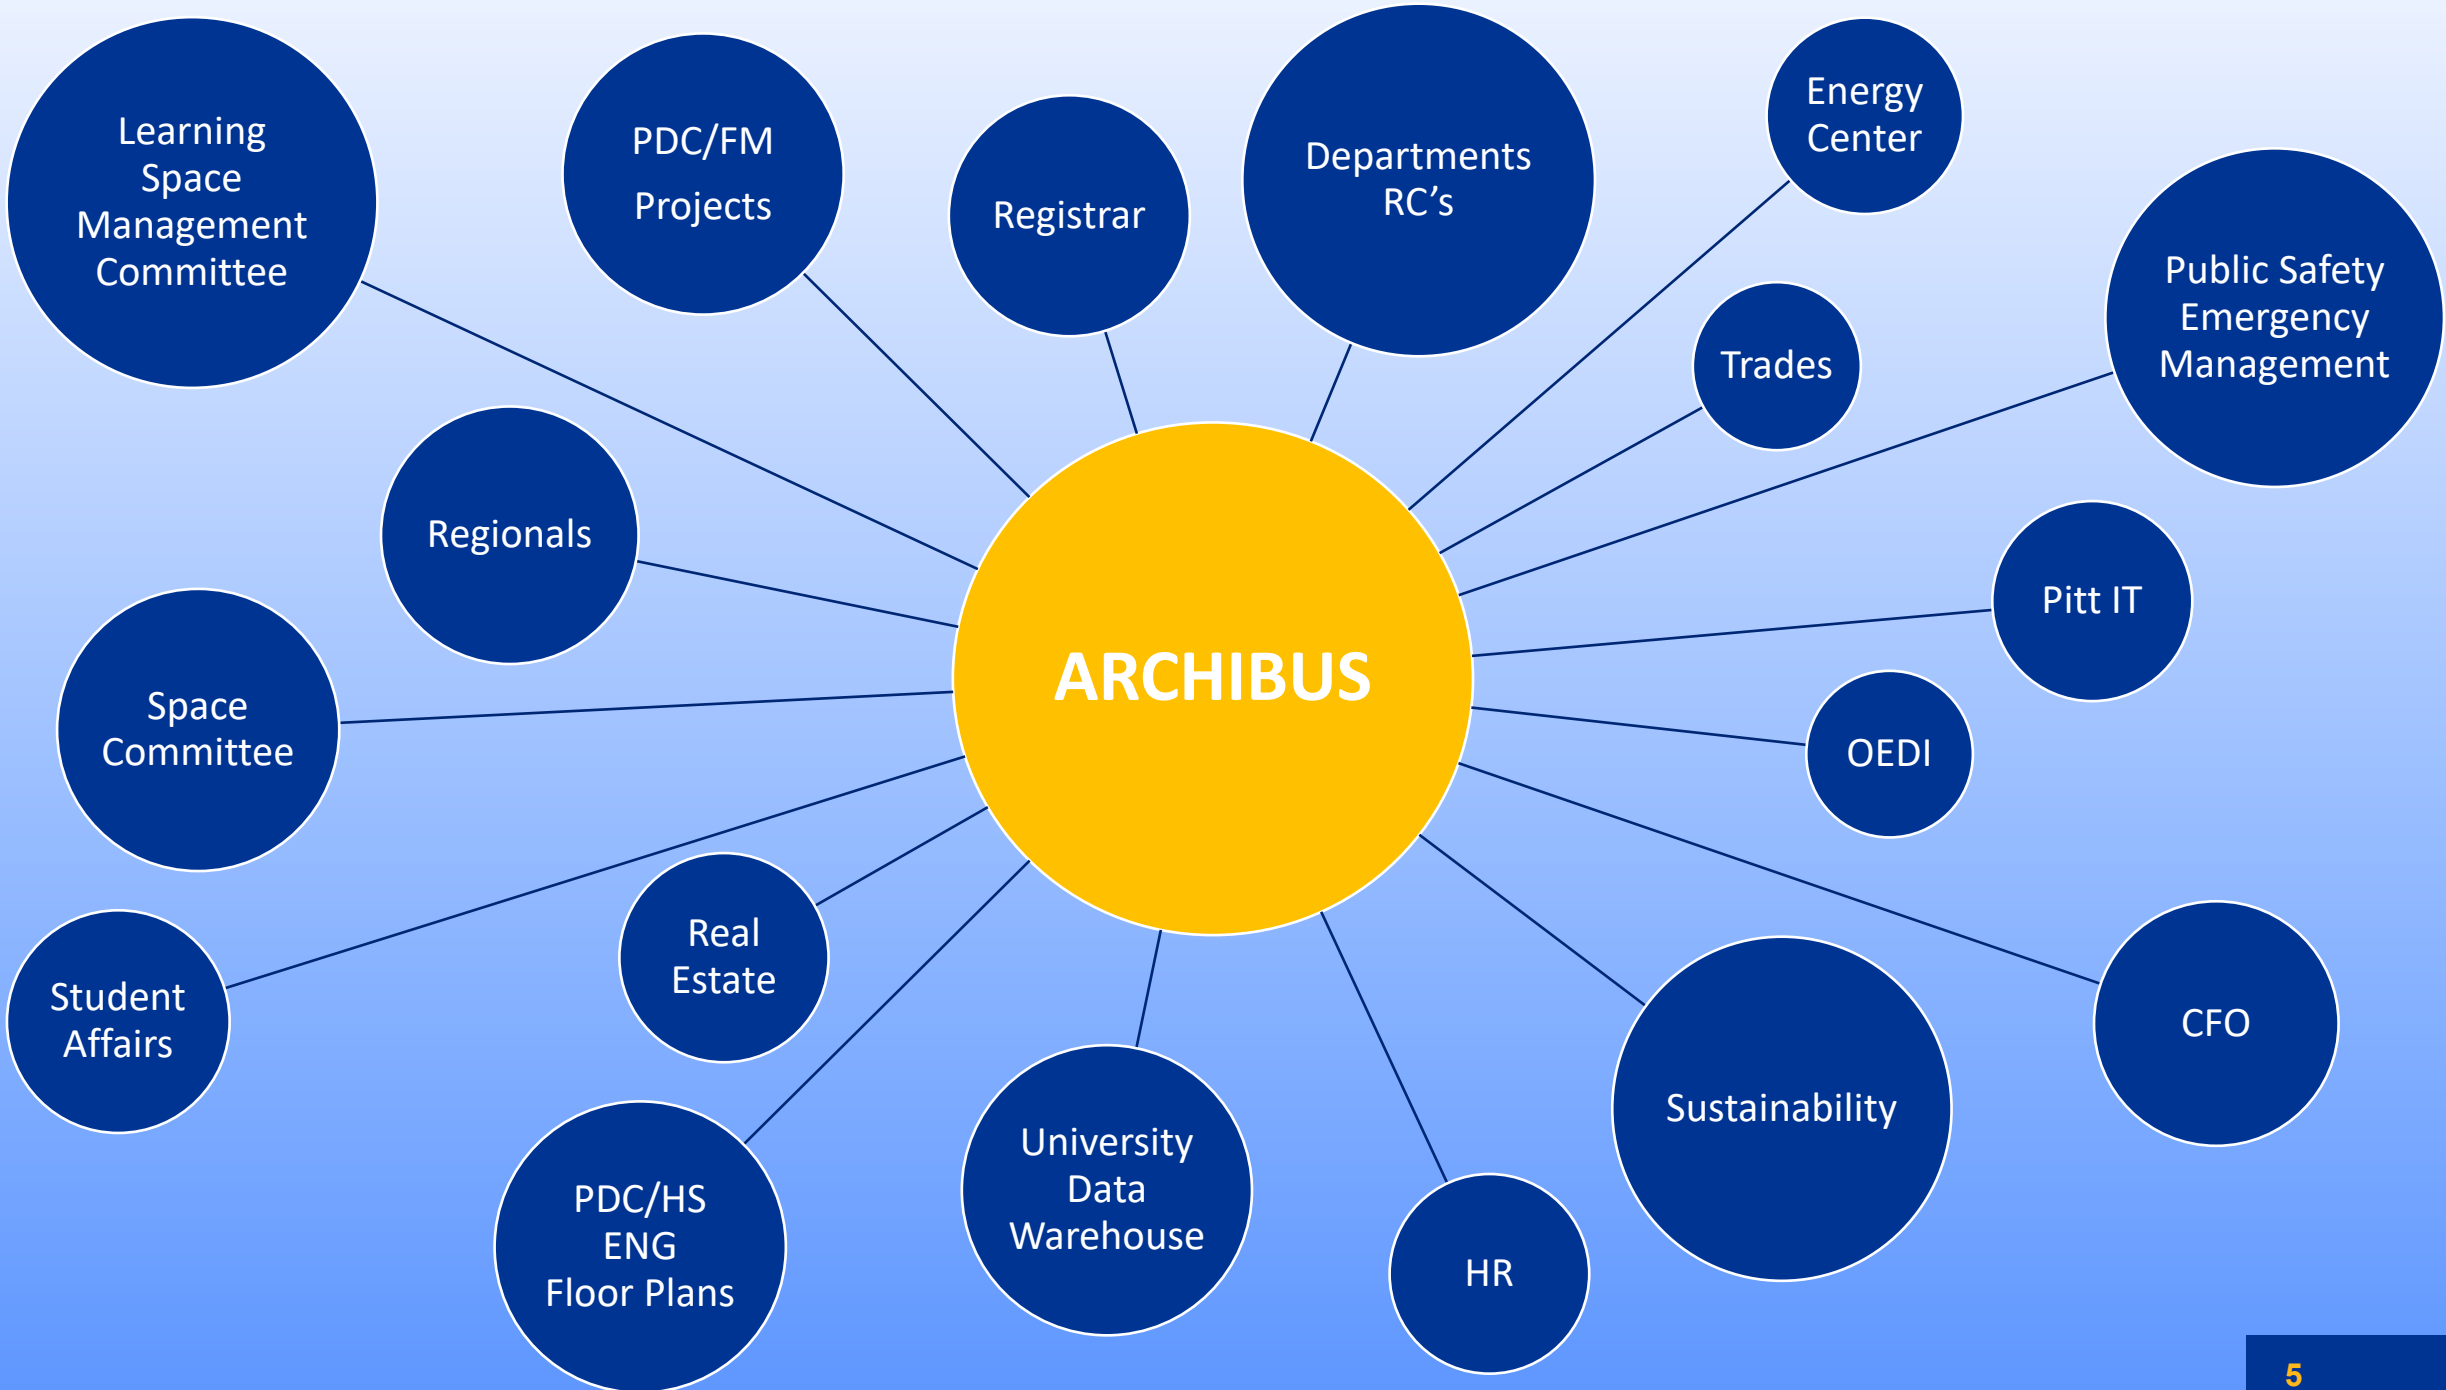

INSITE –1995-2024

INSITE is Pitt's old space inventory management system.

Three INSITE systems were being used on our campus

- FM - Tech Services
- HS – Health Sciences
- SOE – School of Engineering

Data Hierarchy

Site

- PITT (Main)
- Johnstown
- Greensburg
- Titusville
- Bradford

Note: Buildings are being tracked by the campus that they are associated with NOT always their physical location – example: Pymatuning Research Cabins

Building

Building – Data Elements

- Building Code (unique 3-digit Code)
- Building Name (formal name or address)
- Location (Address, On/Off Campus)
- Status (Owned, Leased, Demolished, Sold)
- Area (GSF of every floor of a building minus OTB))
- Dates (Date Built, Date Acquired, Date Disposed)
- Cost to Replace
- Comments

Floor

Floor – Data Elements

- **Floor Code** – B, 01, 01M
- **Floor Name** – Basement Floor, First Floor, First Floor Mezzanine
- **Floor Areas**
 - Area - GSF
 - Net Usable Area
 - Structural Area
 - Assignable Area
 - Nonassignable Area

Floor - Area Calculations

Gross Square Footage (GSF)

is calculated by drawing an outline around the exterior face of the building on each floor level. Everything within that area is calculated as GSF.

Note:

Open-to-Below is subtracted from the calculation

Floor - Area Calculations

Net Usable Area (NUSF)

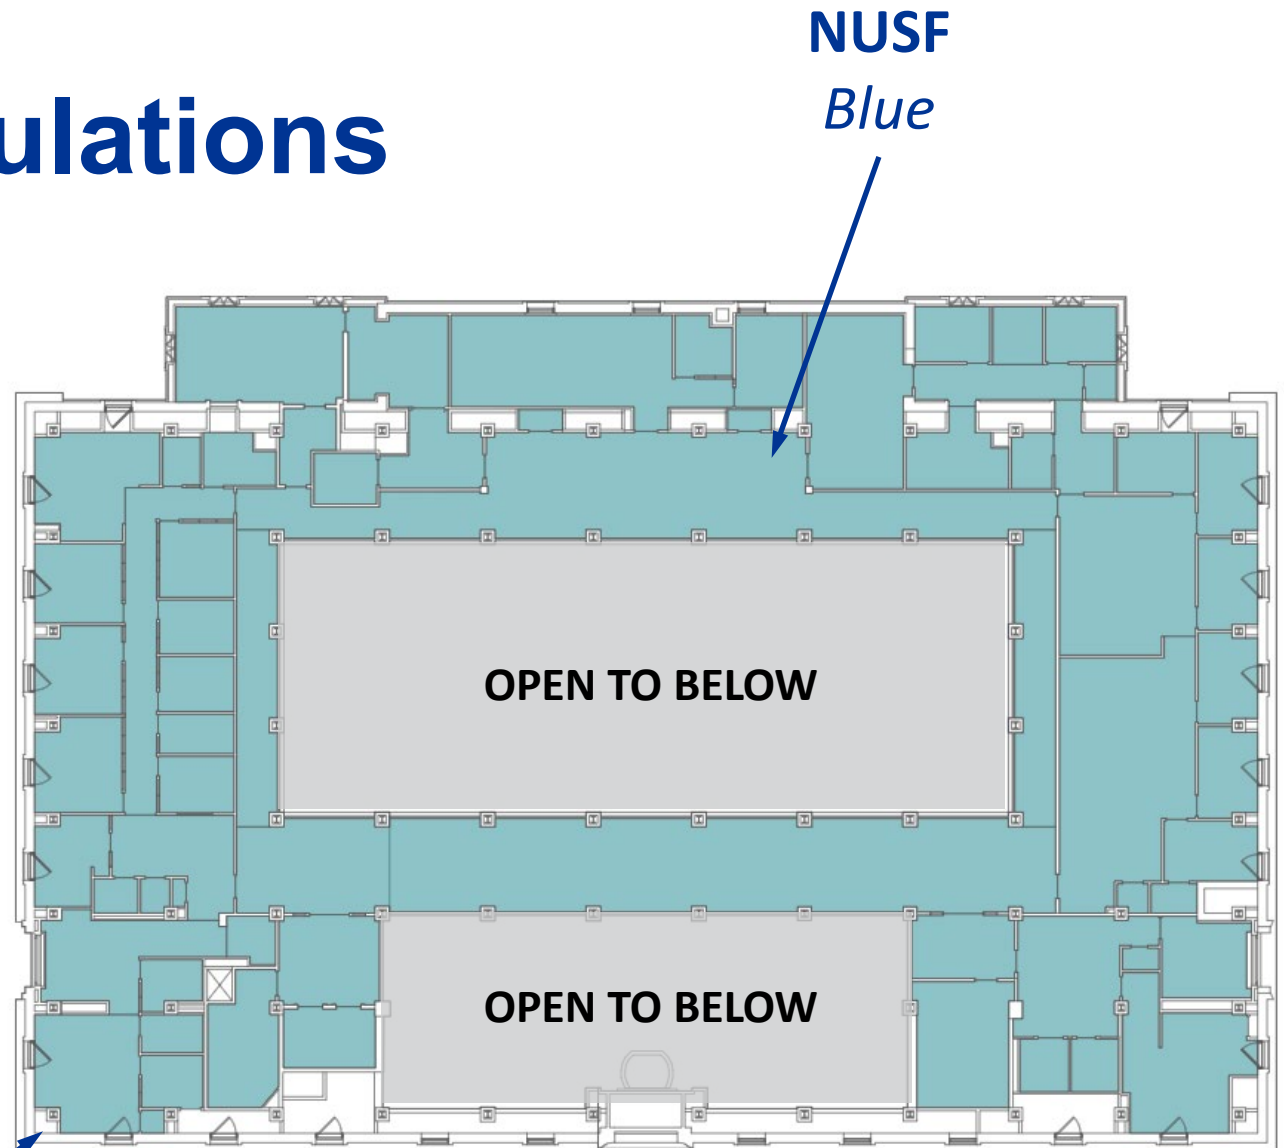

is the sum of all rooms on the floor

Note:

NUSF is also known by Net Square Feet (NSF)

Structural Area

GSF minus NUSF

Structural Area
White

Floor Area - Calculations

Assignable Area (NASF)
(Purple) *offices,
classrooms, labs, etc*

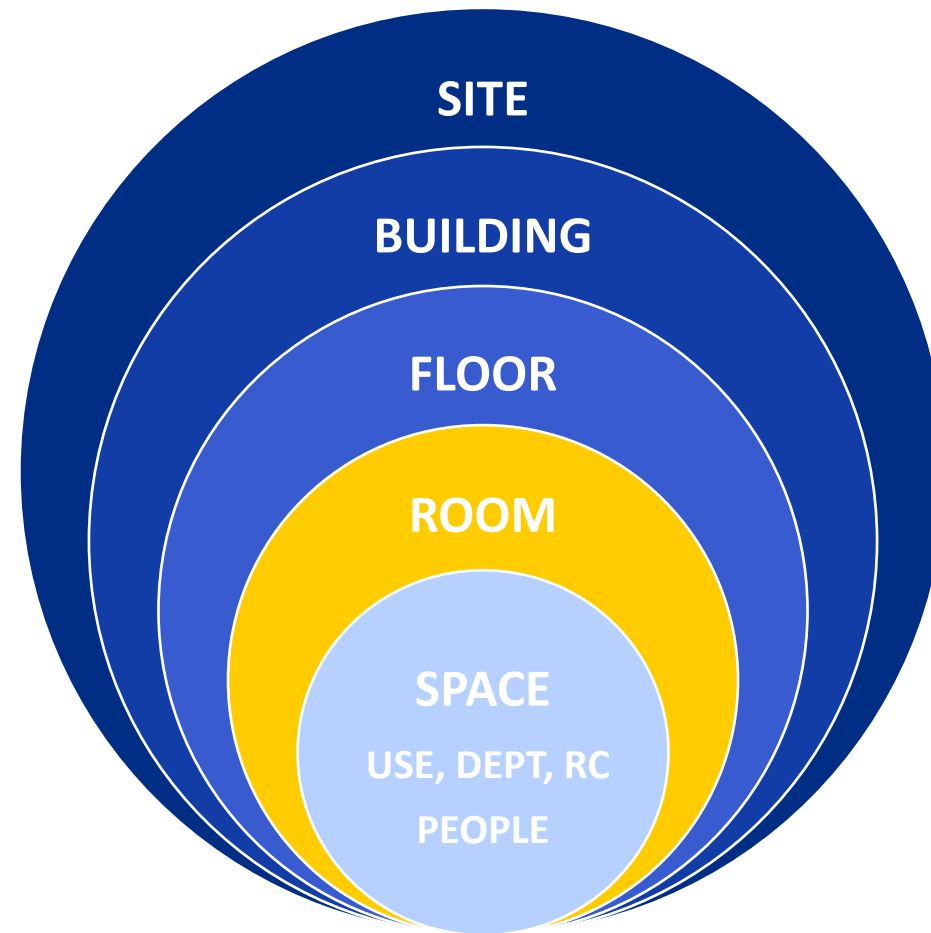

Nonassignable Area
(NASGN) (Gray) *public
circulation, building service,
and mechanical*

Departments

10-06130	SVC & Provost-Adm & Fin Aid
56-01057	SVC PAE-PAE Alumni Affairs
NASGN-NASGN	Non-Assignable-NASGN

Room

Room – Code & Area

- **Room Codes (Room #)**
align with how room numbers are signed within a building.
- **Room Area** is calculated by drawing an outline around the interior face of the room surfaces. This is referred to as *Paint-to-Paint*

Note:

We do not use the BOMA standard which is *Centerline-to-Centerline* of walls

PAINT-TO-PAINT

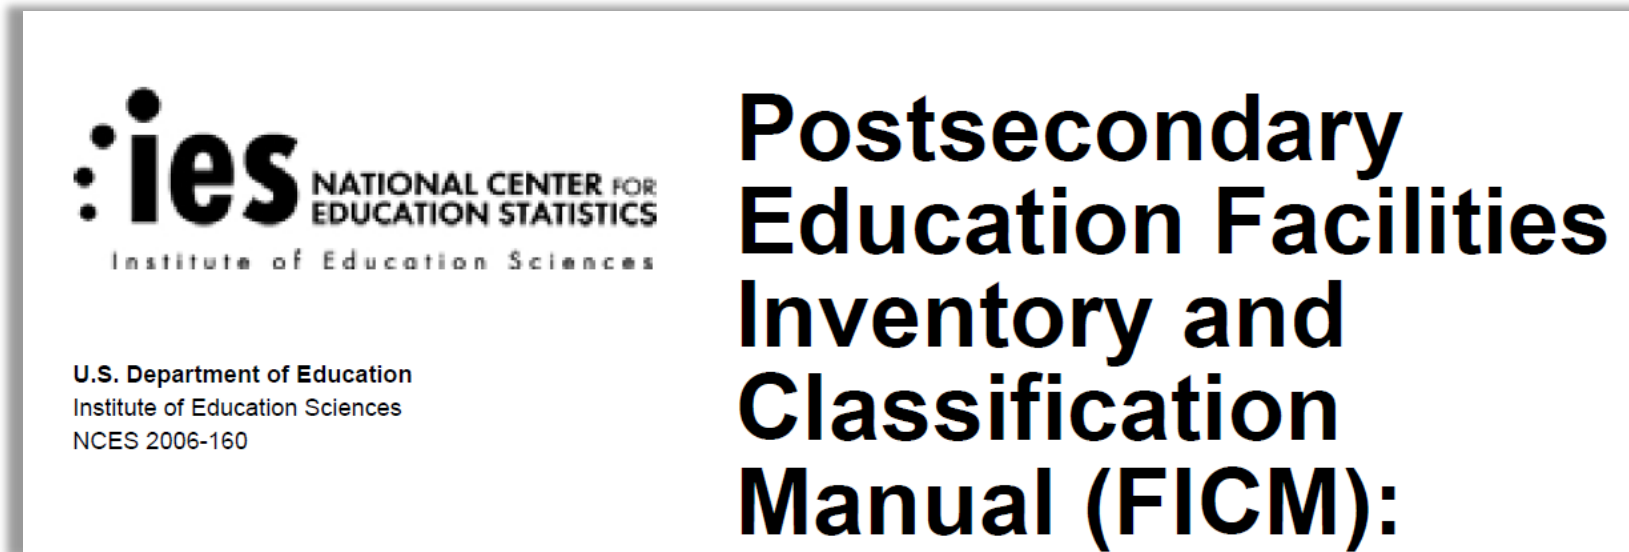

Space

Space – Data Elements

- Space Use Codes (FICM)
 - Room Categories
 - Room Types
- Department Codes (5-digit code from CFO account string)
- Responsibility Center (RC)
- People – currently Health Sciences & School of Engineering track people/PI's within space

Space – Space Use Codes & FICM

WEBSITE - <https://nces.ed.gov/pubs2006/ficm/index.asp>

PDF - <https://nces.ed.gov/pubs2006/2006160.pdf>

Space - Room Categories/Types

Assignable Space

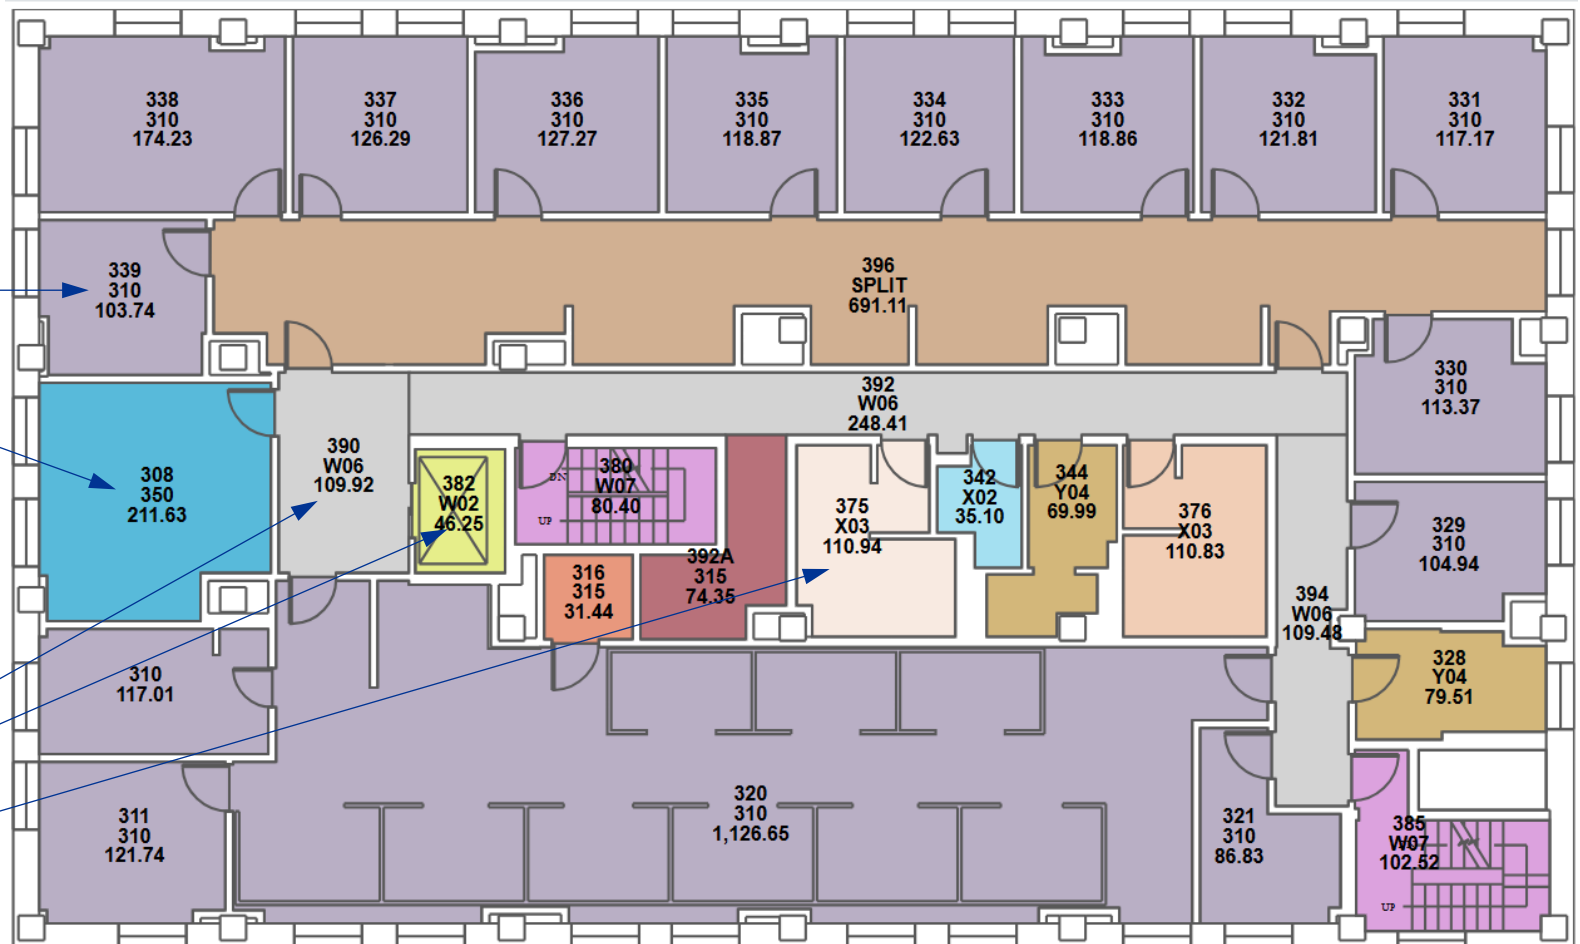

is assigned to a department

- 310 – Office
- 350 - Conference

Nonassignable Space

is NOT assigned to a department

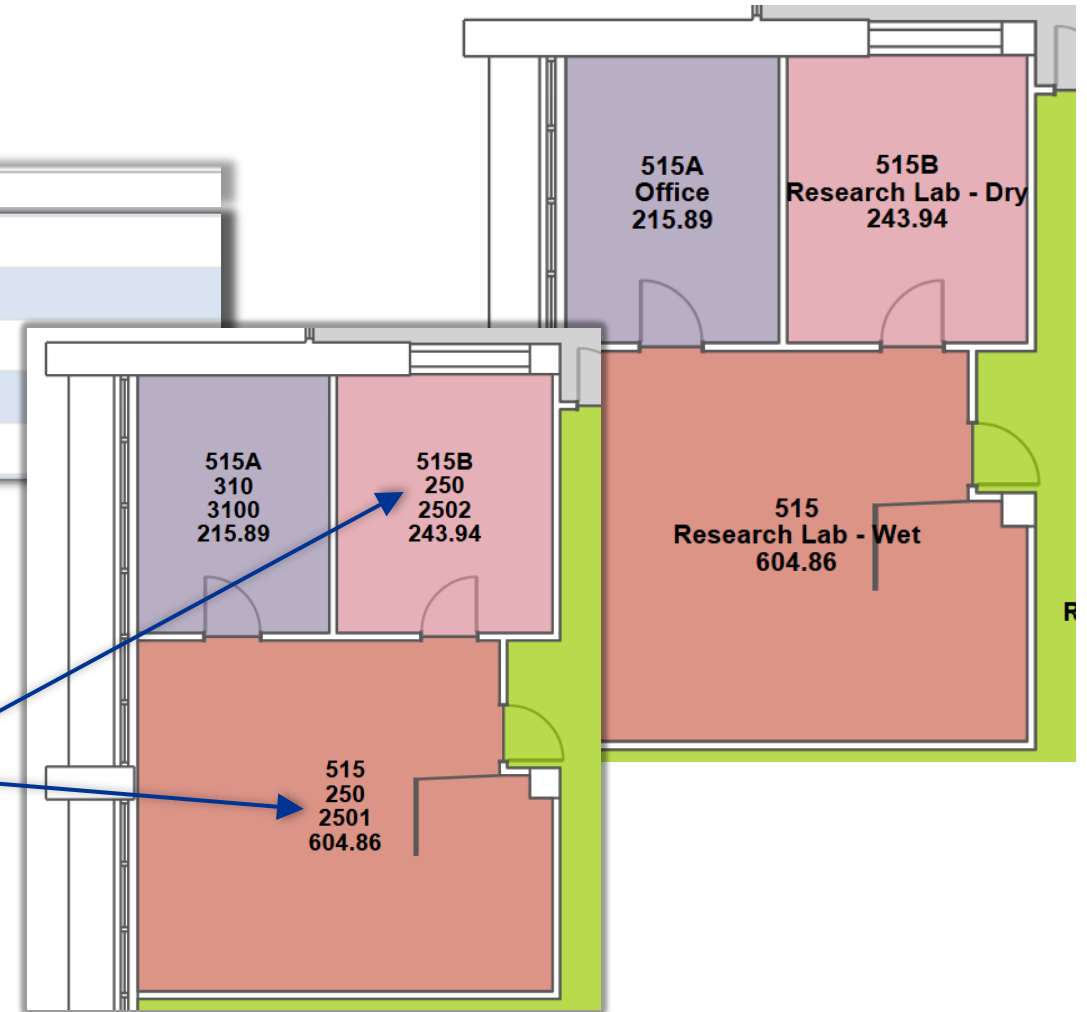

- W06 – Public Corridor
- W02 – Elevator
- X03 – Rest Room

Space – Room Type Sub-Codes

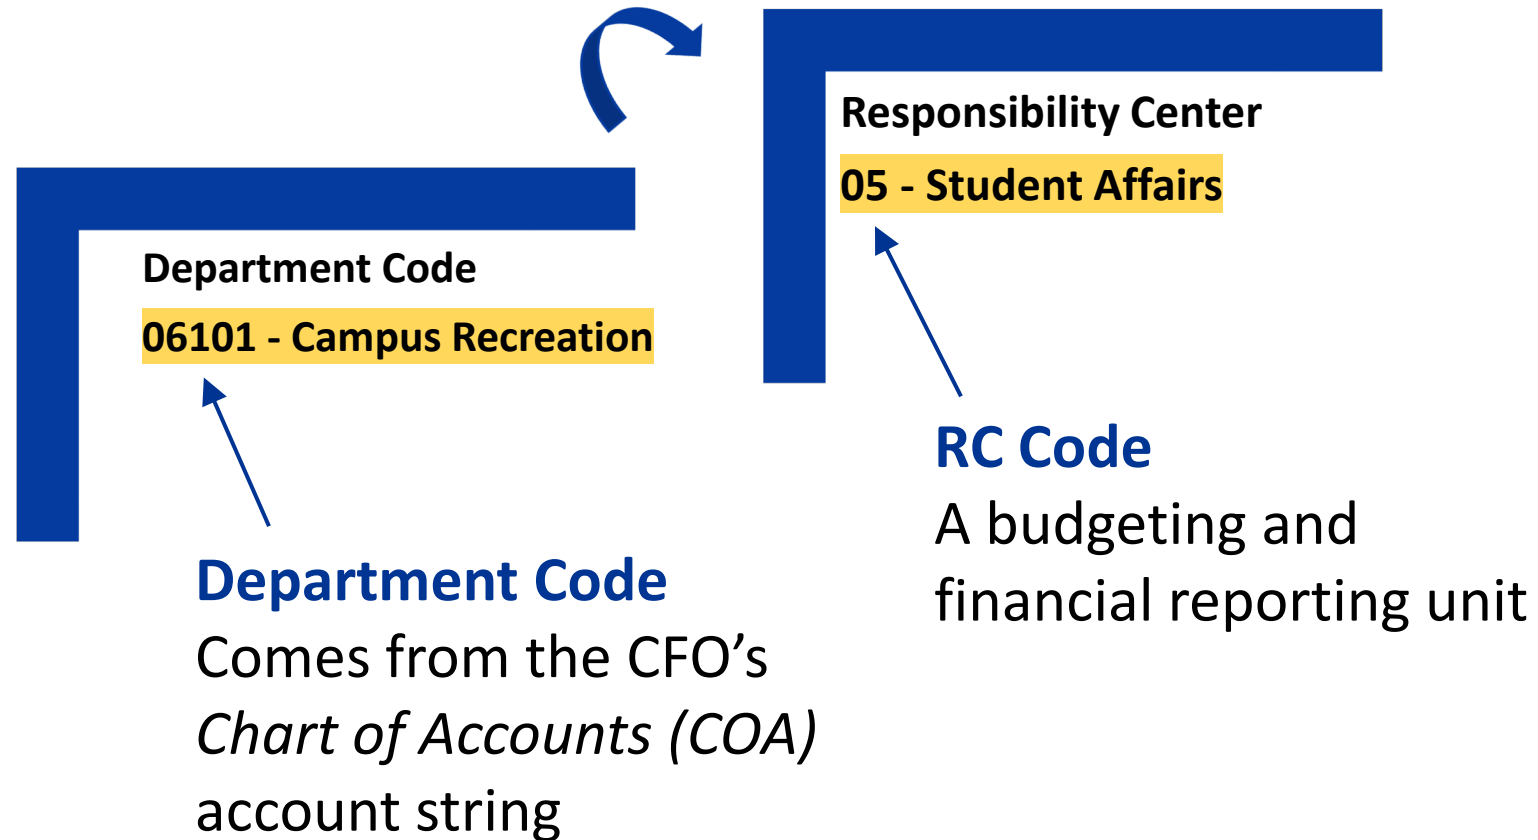

Room Type Sub-Codes

Room Category	Category Description	Room Type	Type Description
250	Research Lab	2500	Research Lab
250	Research Lab	2501	Research Lab - Wet
250	Research Lab	2502	Research Lab - Dry
250	Research Lab	2503	Research Lab - Computer
250	Research Lab	2504	Research Lab - Server

Room Code (#)
 Room Category
 Room Type (Sub-Code)
 Square Footage (SF)

Space – Department Code/RC Code
